Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). *See the attached detailed Office action for a list of the certified copies not received. 14) Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e). Attachment(s) 15) X Notice of References Cited (PTO-892) 18) Interview Summary (PTO-413) Paper No(s). 16) Notice of Draftsperson's Patent Drawing Review (PTO-948) 19) Notice of Informal Patent Application (PTO-152) 17) Information Disclosure Statement(s) (PTO-1449) Paper No(s). 20) Other:

Art Unit: :1615

DETAILED ACTION

1. Applicant's election without traverse of the species, 'disinfectants' in Paper No. 9 is acknowledged.

Claims included in the prosecution are 1, 5 and 12-30.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 5 and 12-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The distinction between a micellar dispersion and emulsion as recited in claims 1 and 29 is unclear. Micelles are emulsions since micelles of one phase are in suspension in another phase.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: :1615

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 12-18, 25, 26, 28-30 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 88/00824.

WO discloses liposomal formulations for mucosal application. The formulations contain egg lecithin and antibiotics (note the abstract, Example V and claims).

6. Claims 1, 12-20, 22, 24-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Amselem (5,662,932).

Amselem discloses nanoemulsions containing antifungal agent, miconazole, egg lecithin, tricaprin, cholesterol, oleic acid and tocopherol succinate. The drug:lipid ratios fall within the claimed ratios. The composition further contains surfactants such as Tweens. The modes of administration are oral, rectal and nasal (note the abstract, col. 2, line 33 through col. 3, line 18, columns 5-9 and Example 13 on col. 20).

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

7. Claims 1, 5, and 12-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Schwartz (6,117,415).

Schwartz discloses oil in water emulsions containing either chlorhexidine or triclosan, egg lecithin, triglyceride, alpha-tocopherol hemisuccinate, Tween, peppermint oil.

Art Unit: :1615

The composition also contains the other claimed surfactants. The particles sizes are 250 nm -350 nm (note the abstract, columns 2-3, Examples and claims).

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 1, 12-18, 25, 26, 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 88/00824 cited above.

WO does not teach entire claimed range of lipid to active agent. However, in the absence of showing unexpected results, it is deemed obvious to one of ordinary skill in the art to vary the active agent amounts from the guidance provided by WO since the amounts of active agents to be administered depends on the condition of the disease and other factors.

10. Claims 1, 12-20, 22, 24-30 rejected under 35 U.S.C. 103(a) as being unpatentable over Amselem, (5,662,932) cited above.

Amselem does not teach entire claimed range of lipid to active agent. However, in the absence of showing unexpected results, it is deemed obvious to one of ordinary skill in

Art Unit: :1615

the art to vary the active agent amounts from the guidance provided by Amselem since as stated above, the amounts of active agents to be administered depends on the condition of the disease and other factors.

11. Claims 1, 5 and 12-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwarz (6,117,415) cited above.

Schwarz does not teach entire claimed range of lipid to active agent. However, in the absence of showing unexpected results, it is deemed obvious to one of ordinary skill in the art to vary the active agent amounts from the guidance provided by Schwarz, since as stated above, the amounts of active agents to be administered depends on the condition of the disease and other factors.

Nabi, US (4,894220) is cited of interest.

The examiner cannot find the PTOL 1449 in the file. Applicant is requested to provide a copy of the same.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to *G.S. Kishore* whose telephone number is (703) 308-2440.

The examiner can normally be reached on Monday-Thursday from 6:30 A.M. to 4:00 P.M. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, T.K. Page, can be reached on (703)308-2927. The fax phone number for this Group is (703)305-3592.

Art Unit: :1615

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [thurman.page@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-1235.
